

THE ERGONOMICS CONSORTIUM IS OPEN FOR BUSINESS!

The Ergonomics Consortium Launches.

“After 12 years looking in vain for an organisation like the Ergonomics Consortium, I had to set it up myself”

Nick Taylor, Director

[The Ergonomics Consortium](#) has been developed to give a service to those in Ergonomics and to assist them in their business goals. This is needed more than ever with the recession biting a little harder each month.

Consultants are increasingly finding work scarce with the perception of ergonomics as a ‘luxury’ service. Large consultancies are giving less work to associates as salaried staff are working hard to cover their wages and overheads.

We understand the pressures faced by consultants and aim to provide exactly the services that they need.

Consultants and Suppliers Joining for FREE.

As the Ergonomics Consortium develops, it is relying on the eager input of information and requests from Consultants and Suppliers alike.

The annual subscription that members will pay to access all the advantages of the Ergonomics Consortium are currently being **WAIVED** for a limited time while we develop the bedrock services to the quality that our members demand.
